

Failure to follow procedure again? Operator Error a root cause.

AS FRUSTRATING as it sounds, it's even more exasperating to send employees to re-training and have the problem reoccur. Yet, that is the corrective action most folks will recommend. Why not take a different approach?

“Urgent Response to Performance Issues” uncovers the factors contributing to performance discrepancies and then seeks solutions to mitigate these factors so that the expected per-

formance results can be achieved.

STOP wasting money, time and limited resources on automatic re-training.

Contact HPIS right now for your complimentary consultation on how you can start solving Operator Errors the first time.
